Artyom Tuzov

ML / Computer Vision Engineer — Robotics

Innopolis, Russia | email@example.com | artyomzifir.github.io | linkedin.com/in/artyomzifir
github.com/artyomzifir

Education

Innopolis University, BSc in Data Science & AI, Robotics track – Innopolis, Russia — Sept 2023 – June 2027

- GPA: 4.8, on track for honours diploma
- Thesis: VIKI — multi-camera RGB-D pipeline for robot imitation learning

Experience

Research Engineer, MWS RnD (VK) – Innopolis, Russia — June 2026 – present

- Research and development of agentic AI systems for business applications, reporting to Albert Nasybullin

ML / Computer Vision Engineer, Yandex Cloud – Innopolis, Russia — Late 2025 – Early 2026

- Owned full ML lifecycle for a credit scoring pipeline combining CNN and VLM components

DPO Course Instructor, Innopolis University – Innopolis, Russia — Ongoing, parallel to studies

- Teach professional development courses alongside full-time degree studies

Projects

VIKI — 2026 – present

Multi-camera RGB-D system recording human demonstrations for robot imitation learning

- Pipeline: MediaPipe pose estimation → IK retargeting → SmolVLA policy execution on a UR10 arm
- Dataset built in LeRobot v3.0 format; diploma thesis, targeted as a tool paper submission to RA-L

LLM Swarm

LLM-based mission planning layer for multi-robot systems in ROS2

- Combines MAPF task allocation with BehaviorTree execution for coordinated multi-robot missions

PCB Inspector

YOLO11-based visual inspection node for PCB assembly verification

- Reached mAP50 of 0.964 on assembly-defect detection

Leadership

- InnTendo — founded and grew a 150+ member student community at Innopolis University
- Mentor for first-year engineering teams via the Innopolis Robotics Society, including FaceGuardV3
- Yandex Ambassador

Skills

ML / CV: PyTorch, OpenCV, YOLO, InsightFace, MediaPipe, ONNX Runtime

Robotics: ROS2, LeRobot, IK retargeting, RGB-D perception (RealSense, Azure Kinect)

Engineering: Python, C++, Docker
